Type: ROUTINE INSPECTION
Date: Dec-05-2013

3.125 (a)

FACILITIES, GENERAL.

The tiger enclosure located in the right front of the building has several areas of chain link fencing that are excessively rusted and damaged. The rusted chain link fencing appears to be structurally sound, however these sections need to be replaced to ensure its continuous safety and to contain this tiger in its enclosure. The damaged fencing needs to be replaced or repaired to protect the tiger from injury. The building housing the tigers is enclosed by chainlink gates and another outside perimeter fence. Facilities shall be maintained in good repair to protect the animals from injury and to contain the animals.

TO BE CORRECTED BY: DECEMBER 15, 2013.
